## **M/C Service Solutions Awarded Cypress Corporation Network Migration / Rearchitecture Initiative**

Troy MI – January 23, 2004-- M/C Service Solutions, a leading desktop support and break/fix service provider in the mid-west over the past 20+ years is pleased to announce it has been selected to assist in the migration, implementation, and consolidation of multiple servers for Cypress Corporation.

M/C Service Solutions will be migrating the following core servers for this initiative: Active Directory and Dynamic DNS Server DHCP, Exchange 2000, SMS, SQL, and their current checkpoint firewall server

Today many companies view outsourcing as a way to help them stay competitive and more productive. By outsourcing remedial and basic tasks, management is better able to utilize their team to concentrate on their organizations' unique IT needs and goals.

Over the past several years, M/C Service Solutions has differentiated itself from most service organizations. Their solutions leverage the principles of IT asset management throughout the support lifecycle, providing customers information necessary to better manage their IT asset decisions. Given their experience in large corporations and public sector customers, they have established a capability to quickly adapt our support model to the unique characteristics or requirements of any customer.

Cypress is a leading provider of content management and delivery software. Cypress software is not only an intelligent content manager, but also automatically captures, enhances, collates and delivers documents and other content, enabling organizations in industries including manufacturing, healthcare and financial services to improve productivity, enhance customer service, and reduce costs.
